

WATER PRESSURE CONTROL REGULATOR

1. Flow Testing (Water supply pressure 0.2Mpa:

Level pipe showing (cm)	Water flow per minutes (ml)
20	8800
30	12500
40	14800
50	17300

2. Regulator Using Pressure:

Factory Test Pressure : 0.35 MPa
Advise Working Pressure : (0.2—0.3) MPa

3. Watering Line Length Advise (max length) :

Single supply length : $\leq 110\text{m}$
Two-way supply length : $\leq 60\text{m}$ (in this case total length will cover 120m)
Noted: Above number is the optimal water supply length.
