"clean lines, healthy birds"

Model: NLC100

Nipple Line Cleaner

Product Overview

Over time, poultry nipple waterlines in broiler, layer, and breeder farms become blocked by biofilm, scale, and dirt. This reduces water flow, affects flock health, and increases disease risk.

Our **"Nipple Waterline Dredging & Cleaning Device"** is specially designed to clean and unclog up to 100 meters of waterline efficiently – ensuring clean, safe drinking water for your birds.

Key Features

- ✓ Cleans waterline pipes up to 100 meters
- ✓ Flexible & Bendable – easy to pass through pipeline
- ✓ Made from Fiber Reinforced Plastic (FRP) for durability
- ✓ Can be wound up for easy storage
- ✓ Available in multiple sizes to fit different bird ages
- ✓ Cost-effective solution for reducing mortality

Benefits

- ✓ Removes blockages and residue buildup
- ✓ Prevents bacteria growth and water contamination
- ✓ Improves bird health and reduces medication cost
- ✓ Saves time – quick and simple cleaning process
- ✓ Extends the life of nipple drinking systems
